

Analysis of the construction of modern health governance system from the perspective of One Health

FANG Jun

(Secretary-General of One Health Working Committee of China Biodiversity
Conservation and Green Development Foundation)

Abstract: The health governance by One Health is an important part of national governance. At the “National Parks, Landscape Recreation and Healthy China”, one of a series of activities of the 7th Ecological Civilization and National Park System Construction Seminar, Dr. FANG Jun, Secretary-General of One Health Working Committee of China Biodiversity Conservation and Green Development Foundation (CBCGDF), made a special report entitled *the Construction of Modern Health Governance System from the perspective of One Health*. This special report introduces in three aspects: health challenges and countermeasures faced by human beings; the development and application of One Health; modern health governance and healthy city construction. Based on these three aspects, the author hopes to promote the construction of a modern health governance system and build a healthy city from the perspective of One Health.

Key words: One Health, governance, city
