

Biodiversity Is the Basis for Achieving One Health and Human Being's Sustainable Development

Author: Zhou Jinfeng

Abstract:

Biodiversity is the basis for man's existence and is also our fundamental path to tackle climate change and human health crisis. In order to achieve biodiversity conservation, we need to change our traditional way of thinking and behavior which was formed during the industrial civilization times. Our mindset cannot remain in the industrial civilization mode. The key of eco-civilization is that man must live in harmony with nature.

Key words: Biodiversity, eco-civilization, species distinction, ecosystem, One Health
