

## “Nibble away”: From a cigarette to a hurricane

By WANG Jing

**Abstract:** On December 27, 2022, China Biodiversity Conservation and Green Development Foundation (CBCGDF) released a public welfare promotional film on tobacco control, directly touching on the harm of tobacco to the environment. Based on watching the video “Tobacco Threats the Environment”, this article discusses from the background of tobacco development and the impact of tobacco on health, environment, climate change, food security, biodiversity, etc., and takes a deep look at and thinks about the ecological environment problems of tobacco, and warns more against the consequences of ignoring its gradual changes, in the hope that more changes can begin with the shifting and raising of more people’s consciousness.

**Key words:** Tobacco, environment, climate change, biodiversity
